---

• Hand & Wrist • Shoulder & Elbow • Spine • Hip & Knee • Foot & Ankle •  
• Sports Medicine • General Orthopaedics • Total Joint Replacement •

## Dental Work

- Absolutely NO dental work including a routine cleaning should be done for two weeks prior to surgery and two months following surgery.
- Any questions of a dental abscess or acute infection must be addressed prior to undergoing a total joint replacement surgery.
- If you have any questions regarding a procedure you are due to have; please let the office know as soon as possible so we can prescribe the appropriate pre-medications.
